

EON[®] 1500

EON Powered Series speakers are recognized by Musicians and DJs worldwide as knockout performers. Now, the same

combination of light weight, portability and great sound is also available if you already own a powered mixer or amplifier. Introducing EON 1500, featuring the technology, performance and style of the EON powered series in a new speaker designed for external amplification.

EON 1500 is heavy on the stuff that lets you sound great, but sweat less. In fact, at just 38 pounds, EON 1500 could set the sound-per-pound world record. But, what about performance? EON 1500 features proven JBL components like our liquid cooled compression driver and SonicGuard™ protection that keeps your EON 1500 working even if someone turns all the knobs to 11! Because form follows function, the rugged good looks of EON 1500's advanced copolymer materials will shrug off the damage caused by the bumps and knocks of life on the road. And, when it comes to flexibility,

EON 1500's unique design allows you to use them as a main speaker, tripod mounted or a dual-angle floor monitor.

So, if speakers with great sound, portability and stunning design are an appealing thought, think no further than the new JBL EON 1500. Visit JBL Professional at www.jblpro.com or your JBL Professional dealer.

- **Portable**
- **Externally Amplified**
- **Flexible**
